La gamma Uma propone apparecchi ad emissione asimmetrica che uniscono alte prestazioni ad una geometria minimale ed a dimensioni ridotte, offrendo un elemento compositivo discreto, in grado di generare efficaci ed interessanti effetti luminosi.

The Uma range offers asymmetrical emission luminaires that bring together high performance with minimal geometry and small size, providing a discrete compositional element that can generate effective and interesting lighting effects.

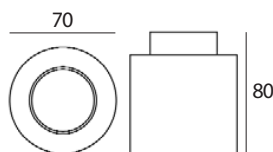

La gamme Uma propose des appareils à émission asymétrique qui associent de hautes prestations à une géométrie minimale et de dimensions réduites, offrant un élément de composition discret, en mesure de générer des effets lumineux efficaces et intéressants.

Die Produktreihe Uma bietet Geräte mit asymmetrischer Strahlung, die erhöhten Leistungen, mit einer minimalen Geometrie und äußerst reduzierten Maßen kombinieren; ein diskretes Element, das effiziente und interessante Leuchteffekte schenkt.

La gama Uma ofrece aparatos de emisión asimétrica que aúnan altas prestaciones con una geometría mínima y unas dimensiones reducidas, presentándose como elemento compositivo discreto, pero capaz de generar unos eficaces e interesantes efectos luminosos.
